PROJECT DETAILS

Project Title	Investment Analysis
Technology	Business Intelligence
Domain	Finance
Project Difficulty level	Intermediate
Programming Language Used	Python
Tools Used	Jupyter Notebook, MS-Excel, Tableau

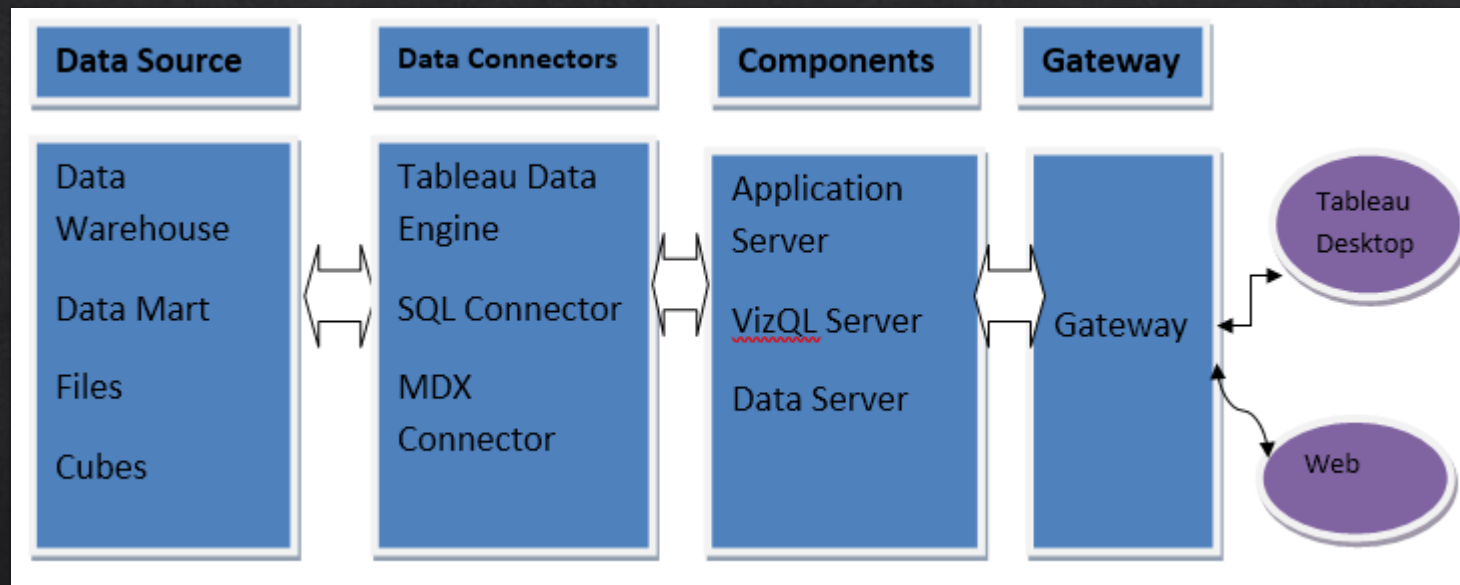

Objective :

The goal of this project is to find the equilibrium investment from the given dataset.

Problem Statement

- ◆ Investment is a game of understanding historic data of investment objects under different events but it is still a game of chances to minimize the risk we apply analytics to find the equilibrium investment.
- ◆ To understand the Foreign direct investment in India for the last 17 years from 2000-01 to 2016-17. This dataset contains sector and financial year-wise data of FDI in India
- ◆ Sector-wise investment analysis
- ◆ Year-wise investment analysis
- ◆ Find key metrics and factors and show the meaningful relationships between attributes.

Architecture

Why parameters are important

- ◆ **Sector:** In the 1st column, Sector names are mentioned. There are total different 63 sectors, some of them are AGRICULTURAL MACHINERY, AGRICULTURE SERVICES, AUTOMOBILE INDUSTRY, COMPUTER SOFTWARE & HARDWARE etc.
- ◆ **Year wise** – Except 1st column, There are different 17 columns and in the columns years are mentioned from 2000-01 to 2016-17. In these column, Investment are mentioned.

Totals Sectors

Total Investment Year Wise

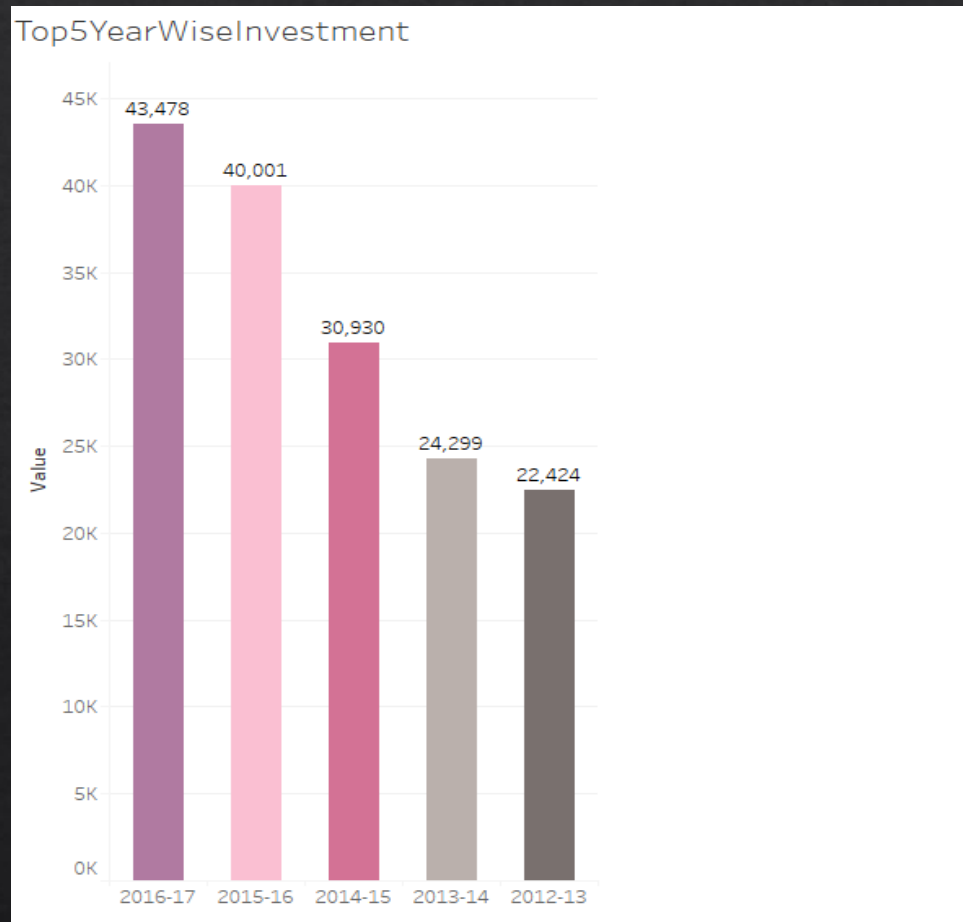

Other Observations

- ◆ Maximum investment is done in SERVICES SECTOR in 2016-17 whereas minimum investment is done in COIR.
- ◆ It is also observed in 2000-01, There are 23 sectors in which no investment is done which is also maximum of no investment in any year.
- ◆ Out of 63 sectors, In 36 sectors average investment is under 100.
- ◆ Market Recession in 2008-09 made big losses for the Investors which was covered by 2011-12.
- ◆ It is also seen that Service Sector was at the highest in all the Years even when the whole sectors were impacted due to crash .
